Gorjian, Varoujan

Nicole Granucci

Theresa Paulsen

John A. Blackwell

Thomas Rutherford

Name is now HR4Sy.....

We have Wiki site for our group...

http://coolwiki.ipac.caltech.edu/index.php/CM4Seyferts_Current_Research_Activities

The old site:

http://coolwiki.ipac.caltech.edu/index.php/HR4AGN_Current_Research_Activities

Guide for using the Wiki:

http://coolwiki.ipac.caltech.edu/index.php/Guide_to_NITARP_participants_for_use_of_the_wiki

Go through the Wiki. Look at the HR4AGN proposal. Get familiar with it. Ask questions, make suggestions, etc.

The sample has yet to be grabbed/determined. Seyferts are fainter: low luminosity info. Varoujan will send out instructions on how to get source info from NED. This will be a bit more meticulous work. Needs to be done before the proposal is submitted. Varoujan will send out instructions on this process.

When should you involve students: some would like to be brought in early. Varoujan likes to keep the proposal part with the teachers at first.

John and Varoujan to send out resources.

Get kids working on background reading. Read through earlier proposals and decipher them.

An idea maybe later on: John shares the HR4AGN data set as an Excel file.

Try out the Wiki: upload things. Try it out.
